

I drive 80 miles each day to and from work. The only local station to carry regular traffic reports does so only in the morning and after noon rush hour. I travel all times of the day. This station also pre-empts the traffic report for sports events- so traffic report is available. XM Radio station 222 services the Los Angeles area, and has helped me more than twice in the last month when making trips from Azusa to El Segundo, mid day for business meetings. XM Radio is providing a service that did not exist prior to their entry. Sustain that service.

Each member of my family (5) also has XM Satellite Radio in their car.

Thank You,

Terry Lamb
